

WATER, CATV, OR PHONE

URD METER BASE

UNDERGROUND SERVICE / POLE TO HOUSE

UNDERGROUND SERVICE

Pole to home

1. There will be a standard charge of \$150. This covers material and installation of conduit and standoff brackets up the pole.
2. A ¼" nylon/poly pull rope must be installed in the conduit. Failure to do so will result in the job being rejected and required to purchase a re-inspection fee of \$30. String or twine is **Not** acceptable.
3. If the minimum depth of conduit (as shown) cannot be obtained, contact LUB for instructions. This minimum is to the top of the conduit and should be at least 24" deep.
4. Conduit must be inspected by the LUB personnel before covering. Inspection fees can be purchased at the LUB office at the cost of \$30. If rejected and a re-inspection is required the fee is also \$30.
5. Water, cable TV, and telephone lines can be installed in the same ditch; however, they must be placed so that they are 12 inches over and 12 inches above power conduits. See diagram on reverse.
6. A 2 ½" slip joint is required at the home between ground level and bottom of meter base.
7. After LUB personnel has inspected and passed installed conduit, a minimum of 12 inches of cover is required over conduit and electric marking tape installed which is supplied by LUB.
